Methods of Introduction: If you would like to do business with the South Tahoe Public Utility District (District), please complete and submit this form. If preferred, you may send a line card, catalog, or letter, and/or contact the District's Purchasing Agent by phone or in person to introduce your company to the District.

Opportunities to quote prices for inventory items are available by asking. For less common purchases, every attempt is made to match previously-introduced vendors to current District needs. While the District recognizes your time and literature as a very valuable resource, it can make no guarantees that your company will be contacted.

Note: References or a Company Profile may be required upon request.

Contractors & Service Providers may be required to maintain and to provide documentation of licenses and insurances, and to provide other applicable business information, prior to performing work for the District.

Vendors who provide "Public work" projects over \$1000 (construction, alteration, demolition or repair work, and maintenance work) are required to be registered with the California DIR and will be required to pay and certify prevailing wages as mandated by California law.

Vendor information is kept on hand indefinitely.

Mail or Fax completed form to the District's Purchasing Agent
